## **BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images may include (but are not limited to):

- BLACK BORDERS
- TEXT CUT OFF AT TOP, BOTTOM OR SIDES
- FADED TEXT
- ILLEGIBLE TEXT
- SKEWED/SLANTED IMAGES
- COLORED PHOTOS
- BLACK OR VERY BLACK AND WHITE DARK PHOTOS
- GRAY SCALE DOCUMENTS

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning documents *will not* correct images,  
please do not report the images to the  
Image Problem Mailbox.**

## (57) Abstract:

**PROBLEM TO BE SOLVED:** To provide a method for manufacturing an NO<sub>x</sub> occluding reduction catalyst for cleaning exhaust gas, wherein a noble metal carried is not covered with the NO<sub>x</sub> occluding material carried and the noble metal can be carried in a uniform distribution state.

**SOLUTION:** In this method for manufacturing an NO<sub>x</sub> occluding reduction catalyst comprising a carrier, a noble metal carried on the carrier and at least one kind of NO<sub>x</sub> occluding element selected from alkali metals, alkaline earth metals and rare-earth elements carried on the carrier, the NO<sub>x</sub> occluding element is carried on the carrier in an adsorptively carrying step using an NO<sub>x</sub> occluding element source which is a compound containing NO<sub>x</sub> occluding elements.
